

Bob Anderson – CEO, Central Region – OSF HealthCare

The arrival of the cyclotron is a huge milestone for this project

The work on the Cancer Institute began over four years ago and the centerpiece was always proton therapy. And to see that coming to fruition today with the delivery of the unit is extremely exciting. Now, we know it will take a whole year to set up and get it ready to go, but the arrival is a huge milestone for this project. :22

OSF is committed to cancer care

OSF is committed to bringing all aspects of cancer care together in a seamless fashion. So whether you live in Peoria or elsewhere in the OSF service area, you can get top line cancer care with OSF. :15

Proton therapy is a game changer for central Illinois

Bringing proton therapy to central Illinois is going to be a game changer. It will allow us to provide a totally unique type of radiation therapy to patients here in Peoria, where people used to have to travel to Chicago or St. Louis to receive that same care. :20
