

Hospitalist by OSF OnCall

OSF OnCall Digital Health provides virtual hospitalist services, a technology-centric solution providing high quality inpatient care for adult patients remotely, 365 days a year. By combining people, processes and technology, the goal is to improve access to care, and ultimately, outcomes.

7 p.m. to 7 a.m.
staffing by physician

Options for
daytime staffing
available

Effective resource
stewardship

Decreased patient LOS

Services provided

- Support for nursing team
- Admission assessment and order placement
- Transfers
- Virtual face-to-face consultations, if needed
- Support for facility-based APPs

Service benefits

- Decreased costs associated with call coverage, locums and contracted staff
- Decreased avoidable transfers
- Improved time to admission orders and medication reconciliation
- More complete orders placed upon admission, initiating full care plans immediately
- Increased provider satisfaction
 - Improved work-life balance
 - Improved support model for APRNs
 - Increased retention
 - More attractive recruitment model

Direct cost savings

- Hospitals pay only one provider for higher quality care across multiple facilities (instead of paying multiple providers for potentially less effective care)
- Efficient night coverage for multiple smaller hospitals by providers who actively manage and interact with patients

Increased daytime
physician efficacy

Increased night nursing
staff satisfaction
